## About us

**Technix Rubber is one of the UK's largest Safety Surfacing, Flooring & Matting, Fendering and Ground Protection manufacturers with specialist expertise, knowledge and understanding of the Rubber & Plastics Industry. We are based in Southampton but serve the whole of the UK and export across Europe, Scandinavia, the Middle East and the Americas.**

Established in 1989, we have a vast range of products, from small bespoke gaskets to huge rubber fenders - most of which can be found on our website. Our biggest news to date has been our investment in our manufacturing facility; we now own and run three large injection moulding machines. This has enabled Technix to rapidly progress to a UK manufacturer.

We pride ourselves in finding the best solution at the best price, so if you can't find what you're looking for on our website, give one of our sales team a call who will be more than happy to help.
